

Innovative **ticketing system** for sport clubs and gigs.

Fans know everything about your club. It's time to know better your fans.

Roboticket was built upon specific sport clubs needs, allowing them to create long term relationships with their fans. We believe that there is nothing more valuable for a club than the people who support it. What we can offer you is the possibility of simplifying the way they attend your events.

Roboticket offers many useful tools that support sale process and bring a new standard to ticketing management.

Accelerate sale

There is nothing better than to see a sold out stadium. Roboticket multichannel distribution is designed for demanding customers.

Customised layout for every club

As every fan we do respect club's colors and emblems. Our web shop is customised and branded according to the club CI.

Transparent user interface

Ticket purchase in just few steps. Your fans will like the way how they can buy tickets and season tickets.

Visualisation venue seating plan

Real-time price and seats occupancy visualisation lets to find free seats easy.

Multichannels distribution

Internet and mobile is matter of time but we still don't forget about ticket office or partners distribution points. Creating an additional sales point is as easy as creating a new user with specific rights.

Flexible sale mechanisms

Flexible mechanism lets to set up single and multi-tickets packages sale, handle close sale or target sale. There is no sales model that we couldn't handle.

Generate all tickets type

Depending of the venue and used access control system we can produce all kind of tickets: printed on thermal paper, print@home, contactless card or mobile NFC.

Operate from Amazon cloud

Roboticket is full web application accessible everywhere. We are hosted on Amazon Web Services with dedicated plans depending of club size.

Sale support

We have many functionalities that support sale process. The most common used are vouchers, membership discounts, closed links and automatic renewals.

Real time reporting.

One of the most important aspects for ticketing managers is to collect and analyze data for further improvement of sale. Beside standard sales reports we build on demand reports - bringing all the important data on the table.

Real time access to sale data.

Monitoring the sales is important to take key decisions during the season.

What make us different

We are flexible and we can adapt to your specific needs, we understand that ticketing is one of the main branch of sport clubs activities. Implementing new ideas is making us better and better every day, our knowledge we share with our clients.

Our software is open for any third party integration that will help develop a better solution for club. Today's integration helps our client to improve communication with fans and track fans activities. Among others we are integrated with MailChimp and Intercom.

Clients

Our goal is to establish a long relationship with club's fans, today we host clubs and venues for which we deliver a fully personalised interface created using new technologies and guided by newest trend.

Currently we have more than 250 000 seat on sale for 9 clubs in Europe including football, speedway and basketball. We are ready for more.

Company

Company started in 2009 delivering a complex solution for municipal stadium in Poznan (44 000 seats). Since then we are constantly growing, today we hire 10 full time developers who are working to upgrade the service for our clients. Since the beginning we sold more than 500 events, we were strongly involved in Euro 2012 in Poland.

We deliver a complex ticketing solution including software & hardware integration.
